- 
- \* **EBIT margin close to 6 % projected for the 2021 financial year**
  - \* **Output volume at around € 16 billion in 2021, above previous year's level**

Based on the presently available information, the Management Board of STRABAG SE expects the previously forecast EBIT margin to be significantly exceeded with a level close to 6 %. The 2021 output volume, as expected, will increase compared to the previous year's value of € 15.4 billion and should reach around € 16 billion.

Earnings for the 2021 financial year are now expected to be significantly higher than previously projected. Market expectations have been exceeded as a result of numerous positive effects on earnings in all segments at the end of 2021 that had not been anticipated to this extent.

The extraordinarily strong situation in the 2021 financial year does not change the planning for the coming financial years.

Detailed business figures and the final earnings will be reported on 29 April 2022.
