72	Statement by the Executive Board

Dear Shareholders,

The past months brought a number of positive developments for the IMMOFINANZ Group. The most important events were the successful refinancing of the 2014 and 2017 convertible bonds, the addition of the IMMOFINANZ share to the leading index of the Vienna Stock Exchange (ATX), the generally positive economic trends in the Group's core countries and the improvement in key earnings indicators.

After the end of the reporting period, IMMOFINANZ AG successfully placed a 2018 convertible bond (CB 2018) that generated proceeds of EUR 515 million. Demand for the CB 2018 was so high that the order book was oversubscribed in a single day and, with a conversion price/nominal value of EUR 4.12 and a coupon of 4.25%, resulted in equally attractive conditions for the IMMOFINANZ Group and investors. Most of the proceeds from this issue – i.e. EUR 465.2 million – were used to repurchase the outstanding 2014 and 2017 convertible bonds. The IMMOFINANZ Group was therefore able to prematurely finance these securities, which can be put by bondholders in 2012, and also significantly improve the term structure of its liabilities.

The IMMOFINANZ share reinforced its position on the Vienna Exchange during and after the reporting period. The share price generally remained on an upward trend throughout the first nine months of the 2010/11 financial year, rising by 12.7% to EUR 3.189 from 31 October 2010 to year-end and to EUR 3.22 on 31 January 2011.

The announced addition of IMMOFINANZ to the Austrian ATX index confirms this positive performance, and will also strengthen the share in the future. After the end of the reporting period, the ATX Committee reported that IMMOFINANZ AG would be included in the leading index of the Vienna Stock Exchange beginning on 21 March 2011.

Economic developments in the core markets of the IMMOFINANZ Group were generally sound during the first three quarters of the 2010/11 financial year. Most countries appeared to have mastered the economic crisis, and signs are pointing toward growth and renewed momentum. The timing is now advantageous to create a strong foundation for future activities. The IMMOFINANZ Group intends to utilise these opportunities through development projects and the acquisition of standing investments.

A sound balance sheet and sufficient liquidity form the basis for these future investments. As part of our portfolio strategy, the Group sold a number of objects during the reporting period. The sale price exceeded the respective carrying amount in all cases, and thereby confirmed the NAV.

The sound development of the operating business in recent months is underscored by results for the reporting period: rental income rose by 5.6% year-on-year from EUR 400.8 million to EUR 423.1 million, and revenues increased 4.1% from EUR 536.8 million to EUR 558.6 million. Income from asset management fell from EUR 347.4 million to EUR 333.5 million due to higher maintenance and renovation activities. In year-on-year comparison, this represents a – still – slight decline in results of operations (EBITDA) from EUR 306.1 million to EUR 292.6 million. Operating profit (EBIT) increased 39.2% from

EUR 246.7 million to EUR 343.3 million, supported by positive valuation results. Financial results, which were influenced by substantial foreign exchange gains in the comparable prior year period, declined from EUR 19.1 million to EUR -91.9 million. Net profit for the period rose from EUR 221.1 million to EUR 229.3 million due to lower income taxes. The diluted net asset value (NAV) per share improved from EUR 4.78 on 30 April 2010 to EUR 5.13 on 31 January 2011, which represents an increase of 7.3%.

Property indicators also improved during the third quarter: the occupancy rate in the IMMOFINANZ properties amounted to 89.0% as of 31 October 2010, but rose to 89.7% by the end of January 2011. The gross return on the standing investment portfolio, which equalled 6.6% for the first half-year, increased to 6.9% in the third quarter.

Based on these positive developments, we expect similar results for the last quarter of the reporting year – above all since we do not expect any negative effects on valuation. This should allow the IMMOFINANZ Group to close the 2010/11 financial year with a significant improvement in earnings and support the recommendation of a planned dividend of 10 cent/share to the annual general meeting.

The IMMOFINANZ Group

Business model & strategy

The IMMOFINANZ Group is a property investment and development corporation that is active in both Eastern and Western Europe. Its shares are listed on the Vienna Stock Exchange. The stability of the West European market and the growth and earnings opportunities available in Eastern Europe, combined with a focus on property rental and development, allow the IMMOFINANZ Group to generate sustainable earnings.

High-quality property portfolio with 89.7% occupancy

The IMMOFINANZ Group has compiled a high-quality portfolio since its founding in 1990, which included over 1,600 investment properties with a carrying amount of approx. EUR 8.5 billion as of 31 January 2011. The IMMOFINANZ properties have 6.7 million sqm of rentable space and an occupancy rate of 89.7%.

Sectoral distribution of the standing investments as of 31 January 2011

The core business

The core business of the IMMOFINANZ Group is the generation of rental income through the active management of a diversified portfolio of investment properties. Additional activities include the realisation of income from development projects and portfolio-optimising sales. The IMMOFINANZ strategy calls for 80% of income to be derived from rentals and 10% each from development projects and selected sales.

The active management of investment properties and the realisation of development projects allow the IMMOFINANZ Group to achieve an optimal balance between opportunities and risk. The investment properties generate steady income, while the development activities create a potential for additional earnings.

Vision & mission

The goal of the IMMOFINANZ Group is the sustainable generation of income from Class A properties in its core markets. The distribution of dividends in the future will make it possible for shareholders to participate in income from the rental, development and sale of properties.

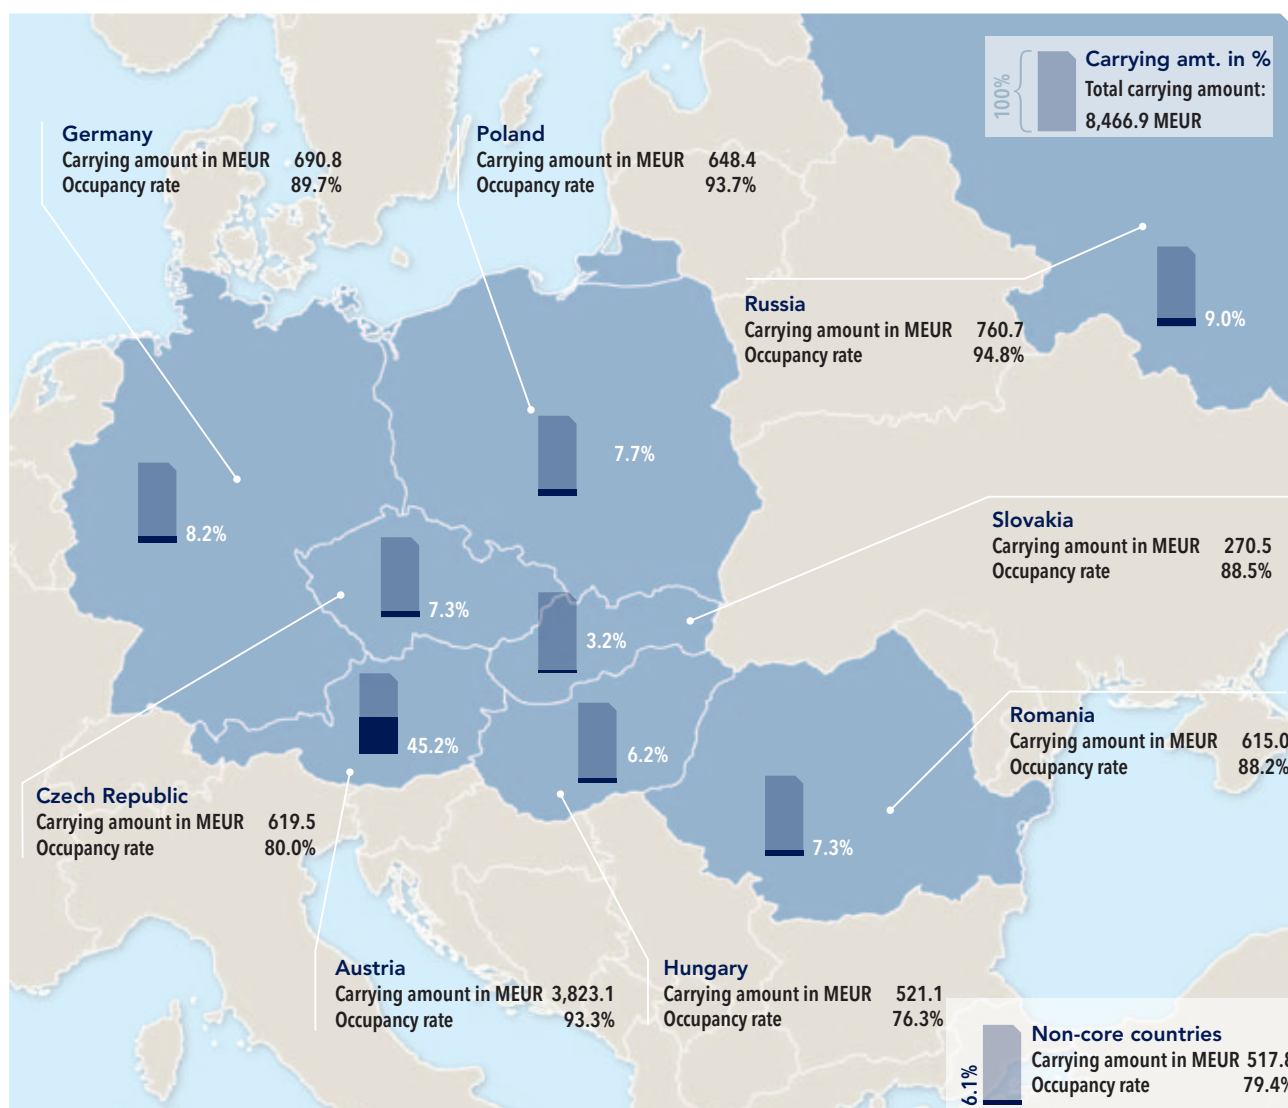

The sale of assets will strengthen liquidity. Annual sales of EUR 500 million will optimise the portfolio by permitting the reinvestment of the proceeds at higher returns. Property sales will concentrate, above all, on investments and objects that do not fit with the core business, the core markets or

the strategic asset classes. Approx. EUR 263 million of such assets were sold during the first nine months of 2010/11.

Four asset classes and eight core markets

The activities of the IMMOFINANZ Group are focused on the retail, logistics, office and residential sectors of the property market as well as the eight regional core markets of Austria, Germany, Czech Republic, Slovakia, Hungary, Romania, Poland and Russia.

Investor Relations

Investor relations activities

The IMMOFINANZ investor relations team continued to intensify communications with financial analysts and investors during the reporting period, taking part in numerous road shows, conferences and trade fairs in Austria and other countries. The main issues involved the refinancing of the 2014 and 2017 convertible bonds, the addition of the IMMOFINANZ share to the leading index of the Vienna Stock Exchange (ATX) and the development of the markets in Central and Eastern Europe.

Conference calls for more dialogue

The IMMOFINANZ Group has expanded its communications offering for analysts and institutional investors. The members of the Executive Board will now present Group results on the day of publication in a conference call, where they will also be available to answer questions from the participants.

Capital market environment and share price

The international capital markets continued to recover from the financial and economic crisis during the reporting period. The mood on European stock markets turned positive, above all following favourable economic reports and an easing of the sovereign debt situation in a number of Euro countries. The Vienna Stock Exchange recorded the second-best performance in the Euro zone with an increase of 16% for 2010. The ATX opened the reporting period at 2,699.28 points and reached 2,885.76 points on 31 January 2011 – which represents a plus of 15.64% compared with year-end 2009. The IATX closed at 190.99 points on 31 January 2011 (+38.88% versus year-end 2009). After the end of the reporting period, the ATX broke the key psychological barrier of 3,000 points on 18 February 2011 and reached the highest level since autumn 2008.

The IMMOFINANZ share

At the end of January 2011 the share capital of IMMOFINANZ AG was divided into 1,044,366,775 zero par value shares with voting rights (ISIN: AT0000809058). All these shares are held in free float by private and institutional investors.

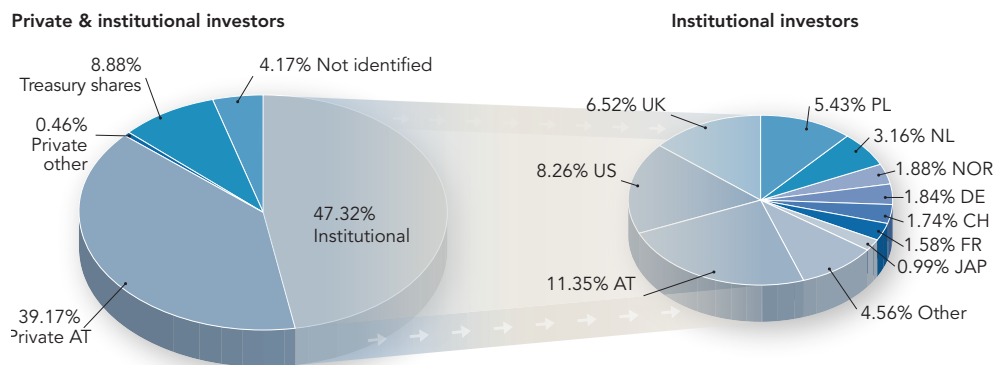

The positive capital market climate also influenced the development of the IMMOFINANZ share, which rose steadily throughout the reporting period. From the end of November to year-end 2010, the price of the IMMOFINANZ share increased 16.6% to EUR 3.189. This represents a plus of 27.56% in comparison with year-end 2009. By the close of the reporting period on 31 January 2011, the IMMOFINANZ share had risen to EUR 3.22. However, the latest events in North Africa, the Middle East and Japan have led to growing uncertainty on the part of investors. This changing mood also affected the price of the IMMOFINANZ share, which fell to EUR 2.78 on 15 March after the end of the reporting period but then returned to an upward trend. On 28 March 2011 the share price amounted to EUR 3.159.

Shareholder structure

The IMMOFINANZ Group surveyed its shareholder structure during February and March 2011 for the first time since 2007. Of the approx. 1.045 billion shares outstanding, more than 95% could be allocated to specific investors or investor groups: 364 institutional investors hold approx. 388,877,000 IMMOFINANZ shares and private investors hold 412,576,186 shares. The feedback from this study shows that the investing community views the company's new strategic orientation favourably and the management of the IMMOFINANZ Group is considered to stand for efficiency and an increase in value.

Structure of private and institutional investors by country

The investor relations team will use the results of this study to strengthen its focus on the needs of investors. Information gained from the study will also flow into communications with investors and the planning of road shows.

Share buyback programme 2010–2011

On 08 November 2010 the Executive Board of IMMOFINANZ AG launched a buyback programme for 47,350,248 of the company's shares in accordance with an authorisation granted by the 17th annual general meeting on 28 September 2010 pursuant to § 65 (1) no. 8 of the Austrian Stock Corporation Act.

The share buyback programme was successfully concluded on 18 March when the planned volume of 47,350,248 IMMOFINANZ shares was reached. A total of EUR 145.8 million was spent to purchase these shares, which represents an average price of EUR 3.078 per repurchased share.

Convertible bond issued

After the end of the reporting period, IMMOFINANZ AG issued a convertible bond (CB 2018) that has a term ending in 2018. The proceeds were used, above all, to repurchase the convertible bonds (CB 2014 and CB 2017) that can be redeemed by the bondholders in 2012. The issue volume of the CB 2018 totalled 125,029,692 convertible bond certificates with a total nominal value of approx. EUR 515 million.

Details on the convertible bond are provided under the section on "Financing" beginning on page 34.

The Market Environment

The economic recovery in Europe continued during and after the reporting period. According to EuroStat, economic performance in the EU rose by 2.1% quarter-on-quarter during the last three months of 2010. A comparison of the third and fourth quarters of 2010 shows a plus of 0.2% for the European economy.

Economic development has been sound in all core regions of the IMMOFINANZ Group. The EU Commission sees Poland as the most dynamic member state with growth of 4.1% in 2011. In the Euro zone, Germany ranks first with a forecasted increase of 2.4% in GDP.

The property markets in the core regions of the IMMOFINANZ Group were characterised by generally favourable development during the reporting period. The fourth quarter of 2010 brought an increase in the demand for commercial properties across Europe. According to the international broker CB Richard Ellis (CBRE), the transaction volume rose by 27% over the fourth quarter of 2009.

The gap between the various property markets in Europe widened during the reporting period. A study on the “Emerging Trends in Real Estate Europe 2011” by the auditing and consulting firm PwC and the Urban Land Institute (ULI) indicates that property markets in the Euro crisis countries – above all Athens and Dublin – are losing ground. In contrast, earnings opportunities in Northern and Central Europe continued to improve during and after this time. The property markets in Eastern Europe have, for the most part, mastered the crisis. According to CBRE, their 7% share of the total property investment market in Europe was just as high in 2010 as before the crisis. The upward trend in investments has been particularly strong on the core markets of the IMMOFINANZ Group: more than two-thirds of all property investments in Eastern Europe were made in Russia and Poland, followed by the Czech Republic with approx. 12%.

Rising demand for properties in Europe

Austria

The export-driven growth in the Austrian economy continued during the reporting period, but at a somewhat slower pace toward the end of the year. The Austrian National Bank economic indicators reported third to fourth quarter growth of 0.4% in GDP for 2010, while data for 2011 show a slight improvement to 0.5% in the first quarter. A recent WIFO study shows that Austria was one of the four EU countries whose economy was least affected by the global crisis. Experts are assuming steady growth in the economy over the long-term, but momentum could decline during the first half of 2011.

**7% rise in
apartment prices**

The Austrian property market reacted with a delay to the economic upturn. Demand in the office sector stabilised during the reporting period and, according to the analysts at EHL, a slight increase in the demand for office properties is expected in 2011. The production of new space will fall to a historical low of not more than 180,000 sqm, and the market prices for top investment properties will continue to rise. At the end of January 2011, top rents for office space amounted to EUR 21.00. The retail market was characterised by stable rents and low vacancies at prime locations. In less attractive areas, higher vacancy rates have been noted. Price increases were noted in the residential sector during the reporting period, in part due to a decline in building permits and a resulting supply shortage. Apartment prices rose by 7% in good and very good locations and by nearly 5% in average locations during 2010.

Germany

The upturn in the German economy slowed somewhat at the beginning of the reporting period. Growth in the fourth quarter of 2010 reached only 0.4%, compared with 0.7% in the third quarter. Momentum rose again at the beginning of 2011 and subsequently continued on a broad basis. Germany leads the Euro zone with forecasted GDP growth of 2.4% (up from 2.2% in the autumn forecast) for the first half of 2011. The German Commerzbank is expecting an increase of roughly 3% for the full year. The number of company bankruptcies fell by 4.6% in 2010. An analysis by Deutsche Industrie- und Handelskammertag (DIHK) indicates that commercial and retail companies plan substantial workforce increases with the hiring of an additional 300,000 employees.

The economic upturn also led to growth on the German property markets. According to the Wohn-Index Deutschland, which is published by the consulting firm F+B, the prices and rents for residential properties rose by nearly 3% in 2010. A slight decline was noted during the fourth quarter (-0.4% compared with the third quarter), but this level still reflects an improvement of 2.7% over the fourth quarter of 2009.

Approx. 2.45 million sqm of office space were rented in Berlin, Düsseldorf, Frankfurt am Main, Hamburg and Munich during 2010. This represents an increase of 27% in relation to 2009. Top rents are stable to rising, while vacancy rates show a slight decline. An analysis by Jones Lang Lasalle reported an increase of 2.5% in top rents on the Berlin office market from the third to the fourth quarter.

**Logistics rentals
in Germany at
all-time high**

The economic recovery triggered a faster-than-expected boom on the market for logistics space, with demand reaching an all-time high during the reporting period. In 2010 rentals totalled nearly 1.8 million sqm (for own use and to third parties) on the markets in Berlin, Düsseldorf, Frankfurt am Main, including Wiesbaden/Mainz, Hamburg and Munich – which is the highest level ever recorded in a single year. The rental prices for logistics space rose slightly during the reporting period, and remained constant in Frankfurt am Main.

The German property market continued its growth course after the end of the reporting period, and this sound development is attracting a growing number of international investors. In a survey by

Realogis brokers, British property investors name Germany as their primary investment target for the next three years.

Deutsche Lagerhaus, a subsidiary of the IMMOFINANZ Group, recorded its best-ever results for rental income in 2010. New rental contracts were concluded for approx. 90,000 sqm of space, and extensions were signed for approx. 52,000 sqm.

As part of its portfolio optimisation programme, the IMMOFINANZ Group sold a retail property in Hamburg to Aachener Grundvermögen Kapitalanlagegesellschaft after the end of the reporting period. The selling price exceeded the carrying amount by a substantial margin. The parties have agreed not to disclose any information on the purchase price. In addition, the *Castrop Rauxel retail park* near Dortmund was sold to Cordea Savills German Retail Fund, a Luxembourg investment fund specialised in retail properties, for EUR 9.8 million.

Poland

Poland recorded the highest growth in the EU for 2009 and also generated sound results in 2010 with a GDP increase of nearly 4%. Companies with foreign capital holdings provide key support for the Polish economy. Statistics compiled by the Polish National Bank show foreign direct investment of approx. EUR 9 billion in 2010, or nearly EUR 500 million more than in 2009. Poland has an outstanding climate for property investments: a study on the “Emerging Trends in Real Estate Europe 2011” by PwC and ULI gave Warsaw an excellent tenth-place ranking, ahead of cities like Zurich, Milan and Frankfurt am Main.

Warsaw rises further in Urban Land Institute ranking

The positive outlook for the Polish economy has led to an increase in the demand for real estate. An above-average rise in value has been noted in the office sector, above all at locations in central Warsaw. Top rents currently range from EUR 21.00 to 22.00. With its strong property portfolio and development projects, the IMMOFINANZ Group benefited from this dynamic market growth and increased the volume of rentals in this country. The IMMOFINANZ Group rented over 11,000 sqm of office space in top buildings to international and national companies in Poland during the period from October to mid-December 2010, and contracts for a further 6,000 sqm were finalised by the end of the year.

Rental prices in the retail and logistics sectors remained stable during the reporting period. The IMMOFINANZ Group benefited from the steady improvement in purchasing power through its shopping centres. According to an analysis by the credit card operator Visa Europe, consumer spending in Poland rose substantially for the fifth time in succession.

The IMMOFINANZ Group successfully concluded EUR 250 million of property-backed refinancing for three key Polish properties during the reporting period: the award-winning *Silesia City Center* shopping mall in Katowice as well as the *IO 1* and *Brama Zachodnia* office buildings in Warsaw.

Czech Republic

The Czech economy continued to record solid growth throughout the reporting period. GDP rose by 2.2% in 2010, and the Czech National Bank revised its forecast for 2011 upward from 1.2% to 1.6% after the end of January 2011. The forecast for 2012 was also raised from 2.5% to 3%. Czech industrial production grew by 10.5% in 2010, with particularly strong development recorded during the reporting period (November: +15.9%). Foreign direct investment doubled during 2010, for experts a clear indication that the economic crisis has ended. In a recent study by the London University Research Centre for Mergers and Acquisitions, the Czech Republic was the highest ranking country in Central and Eastern Europe at 25th place. This listing rates 175 countries, among others according to economic and financial factors, technology and socio-cultural aspects.

Rents in the office and retail sectors did not show any notable change in comparison with the third quarter of 2010. Demand in the office sector is strong, above all for prime objects at top locations. In the retail segment, development activities are concentrated on the expansion of existing shopping centres and new projects in smaller cities.

The opening of the STOP.SHOP. in Znaim (Znojmo) on 04 November 2010 marked the ninth retail park in the Czech Republic for the IMMOFINANZ Group. The catchment area of this over 5,000 sqm facility comprises more than 50,000 residents within approx. ten minutes of travelling time.

**Bauhaus Budweis
sold over
carrying amount**

In connection with its portfolio optimisation, the IMMOFINANZ Group sold the *Bauhaus Budweis* retail property to the CPI Group, a Czech investor, during the reporting period. The EUR 17.2 million sale price exceeded the carrying amount.

Romania

Romania does not intend to draw the last billion in Euros made available by the International Monetary Fund under the 2009 assistance agreement. This announcement by President Traian Basescu shortly after the reporting period is a further sign that the country has slowly emerged from the economic crisis. Unemployment declined from 7.8% to 6.9% and private consumption is approaching the 2008 level. A strict austerity package is protecting the country's financial stability, while an economic upturn is expected to take hold at mid-year and support growth of 1.5% in 2011.

There are also signs of slow recovery on the property market. Developers continue to benefit from low construction costs, and over 280,000 sqm of new office space were placed on the Bucharest market during 2010. This represents a year-on-year increase of 65%. Development was particularly strong in the fourth quarter, when roughly 100,000 sqm of office space were completed. Top rents are stable at approx. EUR 19.00.

Developments in the retail sector also provide grounds for cautious optimism. In particular, electronics retailers fuelled demand during the reporting period. Five projects were completed in 2010 and

a further eight are scheduled for 2011. Forecasts call for an increase in demand, with centres at top locations enjoying high popularity.

The IMMOFINANZ Group is benefitting from this trend with its high-quality portfolio. After the reporting period, a total of 12,000 sqm in the *Maritimo Shopping Center Constanta* were pre-let to international fashion brands like C&A, the Inditex Group and New Yorker and to Cinema City, the leading Romanian movie theatre operator. This project is scheduled to open in autumn 2011.

There was only one major completion on the Romanian retail market in the fourth quarter of 2010: on 04 November the IMMOFINANZ Group opened the first modern shopping and entertainment centre at Baia Mare in northwest Romania – the *Gold Plaza*. Baia Mare, with its 140,000 residents, is one of the largest cities in this region. The facility is located between Strada Victoriei and Independentei Boulevard, the two main traffic routes that connect the eastern and western areas of the city.

Hungary

A high level of sovereign debt will make it relatively difficult for Hungary to emerge from the crisis. As indicated after the reporting period, the country will apparently miss the deficit target set by the EU for 2010. Local media reports indicate the deficit should reach 4% of GDP and exceed the required limit of 3.8%, despite the introduction of special taxes. The rating agency Moody's Investors Service had already downgraded the country to Baa3 – the last "investment grade" level. Optimistic forecasts call for economic growth of 3% in 2011, but the primary requirement for this development is a strong economy in Germany, the most important trading partner of the export-dependent Hungarian economy.

There were no notable investments on the Hungarian property market during the first nine months of 2010/11, and developers and investors are concentrating their activities primarily on top objects. The demand for office space rose during the reporting period, and reached an annual high of 120,825 sqm in Budapest during the fourth quarter of 2010. Rents in the top segment were stable at EUR 20.00; vacancies declined; and strong pressure on prices remained a central factor in the office sector. The demand for retail space declined during the reporting period. Rents were stable at a lower level than before the economic crisis. Consumer decisions are currently based chiefly on prices, which benefits retail parks like the 12 STOP.SHOPs owned by the IMMOFINANZ Group.

On the logistics market, demand declined slightly during the first nine months of 2010/11. Rents were stable, but pressure is rising because many tenants are looking for opportunities to reduce costs. The IMMOFINANZ Group recorded positive development in this difficult market environment with a number of new rentals and contract extensions in the logistics and office segments during the reporting period.

Slovakia

Stable top ratings by agencies like Standard & Poor's and Moody's, high economic growth (4%) and a strong bilateral trading volume that reached the pre-crisis level: the success story of the Slovakian economy continued during the reporting period. However, forecasts for GDP development in 2011 were revised downward from 4.3% to 3.0% following the government's implementation of austerity measures to reduce the federal budget deficit. In 2012 the economy is expected to resume its growth course with an increase of 4.1%.

The construction branch has consolidated. Positive signals are coming not only from the infrastructure area, but also from office building construction. The rents for top objects in the office sector rose slightly to EUR 17.50 during the reporting period, against the backdrop of rising demand and declining vacancies. The current low completion rate is expected to support a continuation of this trend.

The retail market is characterised by subdued consumer spending, which is due in part to the high unemployment. A decline from the current level of 14.4% to 14% is forecasted for 2011, and private consumption should rise by 3.6% year-on-year. Developers are focusing their activities on the retail sector in regions outside Bratislava.

The IMMOFINANZ Group opened two further retail parks in Slovakia during the reporting period. The *STOP.SHOP. Dubnica nad Váhom* is located in the northwest of the country. The catchment area has more than 40,000 residents within approx. ten minutes of travelling time. This *STOP.SHOP.* is almost fully rented. The second, substantially larger *STOP.SHOP.* retail park in Liptovský Mikuláš is situated in the central region of Slovakia. With over 12,800 sqm of usable space on two levels, it lies in a catchment area with more than 75,000 residents who are within approx. ten minutes of travelling time. The tenant mix includes well-known brands like the Terno supermarket, C&A, New Yorker, Takko, Deichmann, dm and KiK.

Russia

Economic momentum in Russia accelerated significantly during the reporting period. The International Monetary Fund raised its estimate for 2010 from 4% to 4.25%, and growth is also expected to reach 4% in 2011. New impulses are coming especially from energy projects, infrastructure construction and telecommunications. Extensive legal amendments are intended to make Russia more attractive for foreign investors. Citybank and the Microenterprise Centre in Moscow are predicting growth for Russian SMEs in 2011. Consumer confidence is rising. Retail turnover increased nearly 5% in 2010, and this upward trend should continue in 2011 and 2012. However, development could be slowed by inflation: prices rose by an average of 0.3% during the first week in February, which translates to an annual rate of 2.7%. Economists indicate that purchasing power could be reduced by rising oil prices. Russia is expecting additional revenues of 1.5 trillion Roubles (EUR 37.8 billion) if the price of oil remains at the high level recorded at the start of 2011.

On the property market, the recovery in the Moscow office sector was an important signal for renewed optimism. More new space was completed during the fourth quarter of 2010 than in the first two quarters of the 2010/11 financial year. Vacancies rose slightly to 15.2%, and rents were constant. Rentals increased by a total of 82% year-on-year in 2010. After Paris, Moscow is now the second largest office market in Europe.

*Moscow has become
the second largest
office market in Europe*

The retail sector, a key market for the IMMOFINANZ Group, is characterised by growth and declining vacancy rates. Experts assume that the positive development on the Russian property market will be sustainable.

Asset and Portfolio Management

The core activities of the IMMOFINANZ Group comprise the rental of standing investments and the development of properties in a number of Central and East European countries. The goal is to create a homogeneous, sustainable portfolio of standing investments that is diversified by eight core markets and four types of use.

The IMMOFINANZ Group concentrates its activities in the core markets of Austria, Germany, Czech Republic, Poland, Hungary, Romania, Slovakia and Russia and in the office, retail, residential and logistics sectors.

Property portfolio

The property portfolio of the IMMOFINANZ Group is presented under four positions on the balance sheet: investment property, property under construction, properties held for sale and inventories.

Inventories represent properties that are developed for sale after completion. Condominium apartments are a classic example of inventories.

The following table shows the carrying amounts of the objects in the property portfolio of the IMMOFINANZ Group as of 31 January 2011:

Property portfolio	Number of properties	Standing investments in MEUR ¹⁾	Frozen development projects in MEUR ¹⁾	Property under construction in MEUR	Inventories in MEUR	Property portfolio in MEUR	Property portfolio in %

¹⁾ Reported on the balance sheet under "investment properties", respectively "properties held for sale"

The carrying amount of this portfolio amounted to EUR 9,254.8 million as of 31 January 2011. The major component by far consists of standing investments at EUR 8,466.9 million or 91.5%. Frozen development projects and undeveloped land have a combined carrying amount of EUR 391.7 million and are also reported on the balance sheet under investment properties. Active development projects and inventories total EUR 177.9 million or 1.9%, respectively EUR 218.3 million or 2.4% of the carrying amount of the property portfolio.

Austria forms the primary regional focus of the IMMOFINANZ Group portfolio with a share of 43.3%, followed by Romania with 9.6% and Russia with 8.7%.

Standing investments

Standing investments represent objects that were held by the IMMOFINANZ Group as of 31 January 2011 for the purpose of generating rental income. The standing investment portfolio had a carrying amount of EUR 8,466.9 million, or 91.5% of the total property portfolio of the IMMOFINANZ Group, and generated a return of 6.9%. The rental of the standing investments generated income of EUR 146.0 million in the third quarter and EUR 423.1 million for the first three quarters of 2010/11.

Total	1,678	8,466.9	100.0	6,694,505	6,007,554	89.7	146.0	6.9

These properties had an occupancy rate of 89.7% as of 31 January 2011. A regional analysis of the standing investments shows the majority located in Austria (EUR 3,823.1 million), followed by Russia (EUR 760.7 million) and Germany (EUR 690.8 million). The highest return in country comparison is generated in Russia with 11.3%.

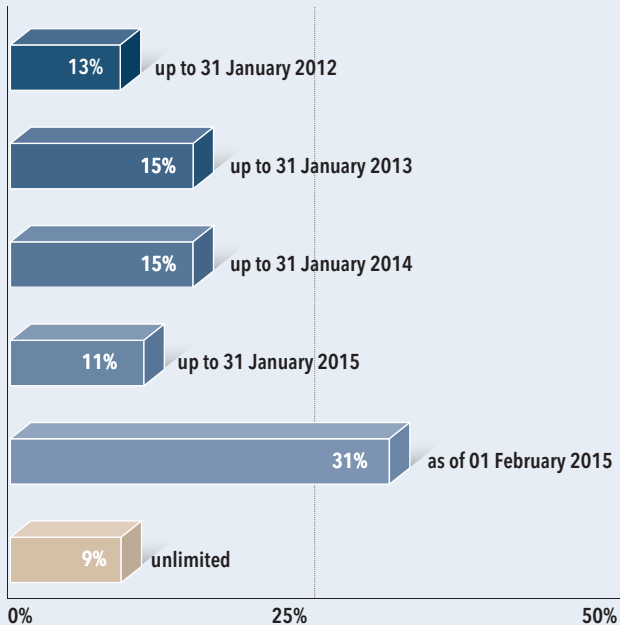

The standing investments in non-core countries include EUR 215.6 million in Switzerland, EUR 116.0 million in the Netherlands and EUR 99.3 million in the USA. The IMMOFINANZ Group also holds standing investments in Croatia, Slovenia, France, Bulgaria and Italy.

The following table shows the distribution of the IMMOFINANZ Group standing investments by sector:

	Number of properties	Carrying amount in MEUR	Carrying amount in %	Rentable space in sqm	Rented space in sqm	Occupancy rate in %	Rental income Q3 2010/11 in MEUR	Return in %

Total	1,678	8,466.9	100.0	6,694,505	6,007,554	89.7	146.0	6.9

The carrying amount of the standing investments held by the IMMOFINANZ Group amounted to EUR 8,466.9 million as of 31 January 2011, whereby 32.1% represent office properties, 24.8% retail objects, 30.9% residential objects and 10.0% logistics facilities. The occupancy rate in the standing investment portfolio equalled 89.7%. These properties generated rental income of EUR 146.0 million in the third quarter of the reporting year, which represents a return of 6.9%. The highest return was recorded in the logistics sector (9.3%), the lowest in the residential sector (5.0%). The occupancy rate was the highest in the residential sector at 95.5% and the lowest in the office segment at 82.2%.

Offices

The carrying amount of the 116 standing office investments totalled EUR 2,716.8 million as of 31 January 2011, which represents 32.1% of the standing investment portfolio. The IMMOFINANZ Group holds standing office investments in all core countries, with the exception of Russia. The rentable space in this office portfolio totalled 1,335,527 sqm and the occupancy rate equalled 82.2% at the end of the reporting period. Rental income amounted to EUR 42.9 million in the third quarter of 2010/11, for a return of 6.3%.

The regional focus of the standing office investments is formed by the core markets of Austria, Czech Republic and Romania. Two of the most important properties in this category are the *Business Park Vienna* in Vienna, Austria, and the *IRIDE Business Park* in Bucharest, Romania.

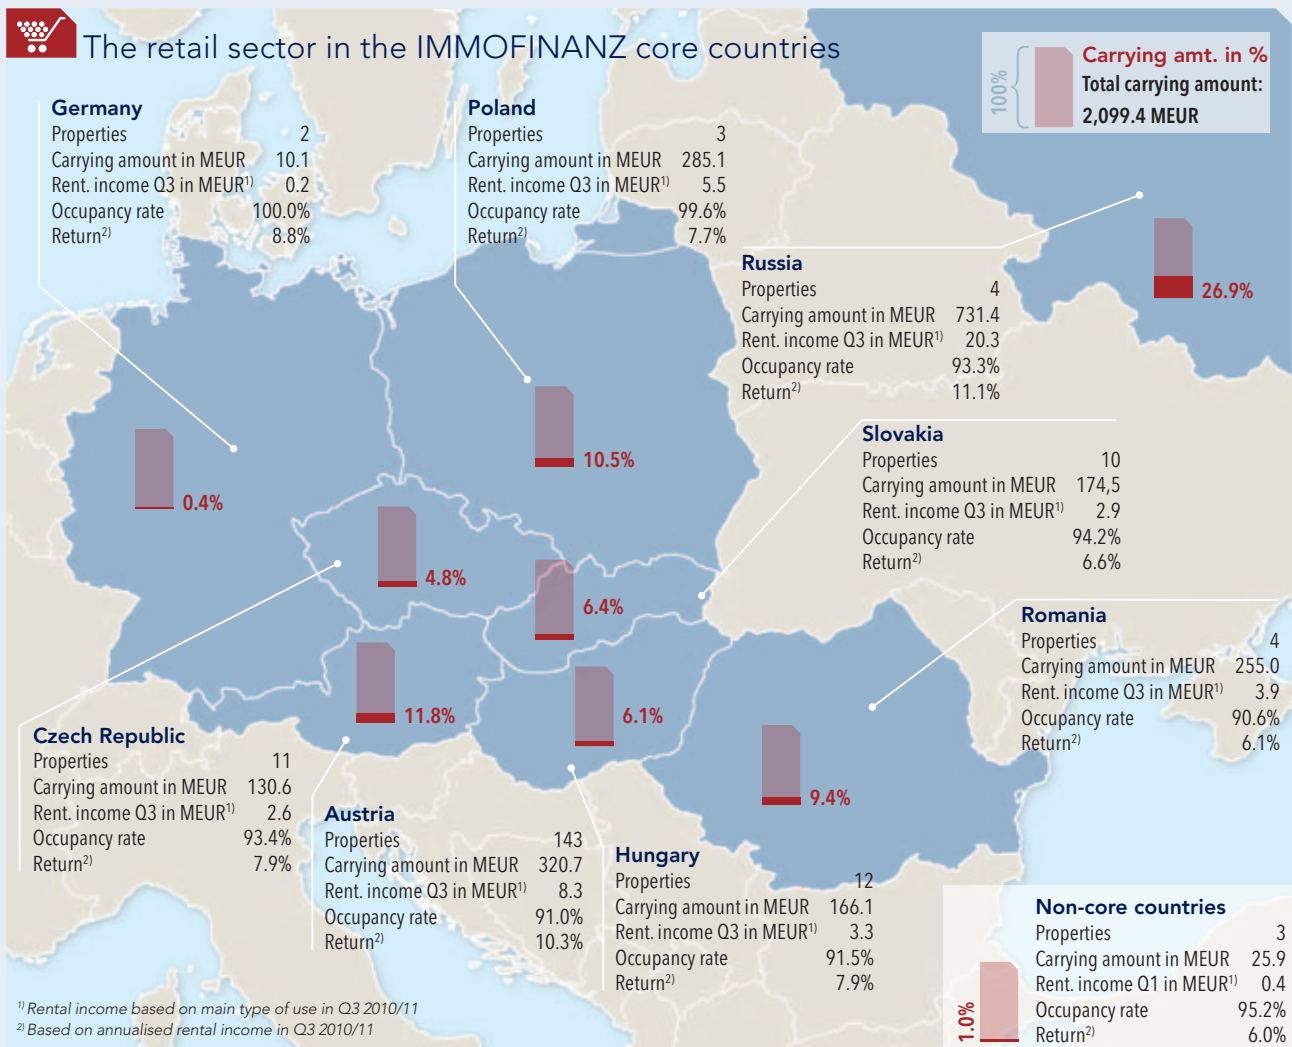

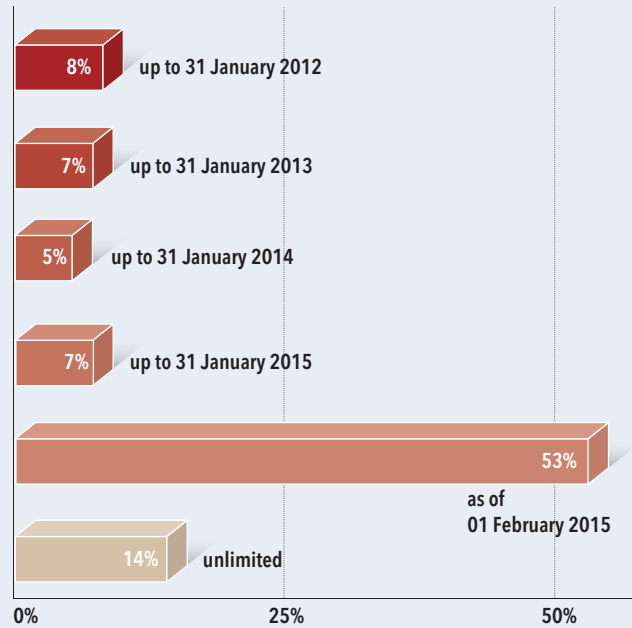

Retail

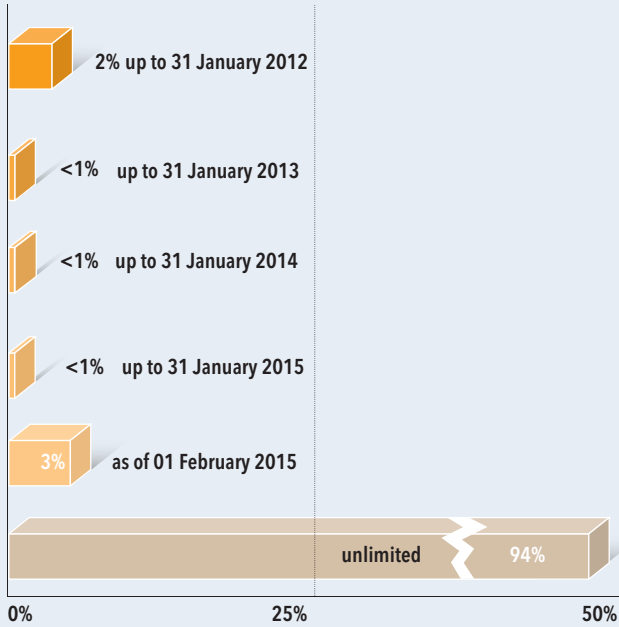

The 192 standing retail investments had a combined carrying amount of EUR 2,099.4 million. Based on rental income of EUR 47.3 million for the third quarter of the reporting year, the return equalled 9.0%. The highest return was recorded in Russia with 11.1%.

A ranking by carrying amount shows the core markets of Russia, Austria and Poland as the major retail markets. The most important properties in this segment based on the carrying amount are two shopping centres: the *Golden Babylon Ros-tokino* in Moscow, Russia, and the *Silesia City Center* in Katowice, Poland.

Residential

The carrying amount of the 1,259 standing residential properties totalled EUR 2,614.1 million, and comprised 30.9% of the standing investment portfolio at the end of the reporting period. Rental income amounted to EUR 32.5 million for the third quarter of 2010/11, which reflects a return of 5.0%. In comparison with the other sectors of the property market, the IMMOFINANZ Group records the lowest return in the residential area. In contrast, the occupancy rate remains high at a constant 95.5%.

Most of the residential properties owned by the IMMOFINANZ Group are located in Austria, followed by Germany. Most of these standing residential investments are held directly by BUWOG, a wholly owned subsidiary of the IMMOFINANZ Group.

The residential sector in the IMMOFINANZ core markets

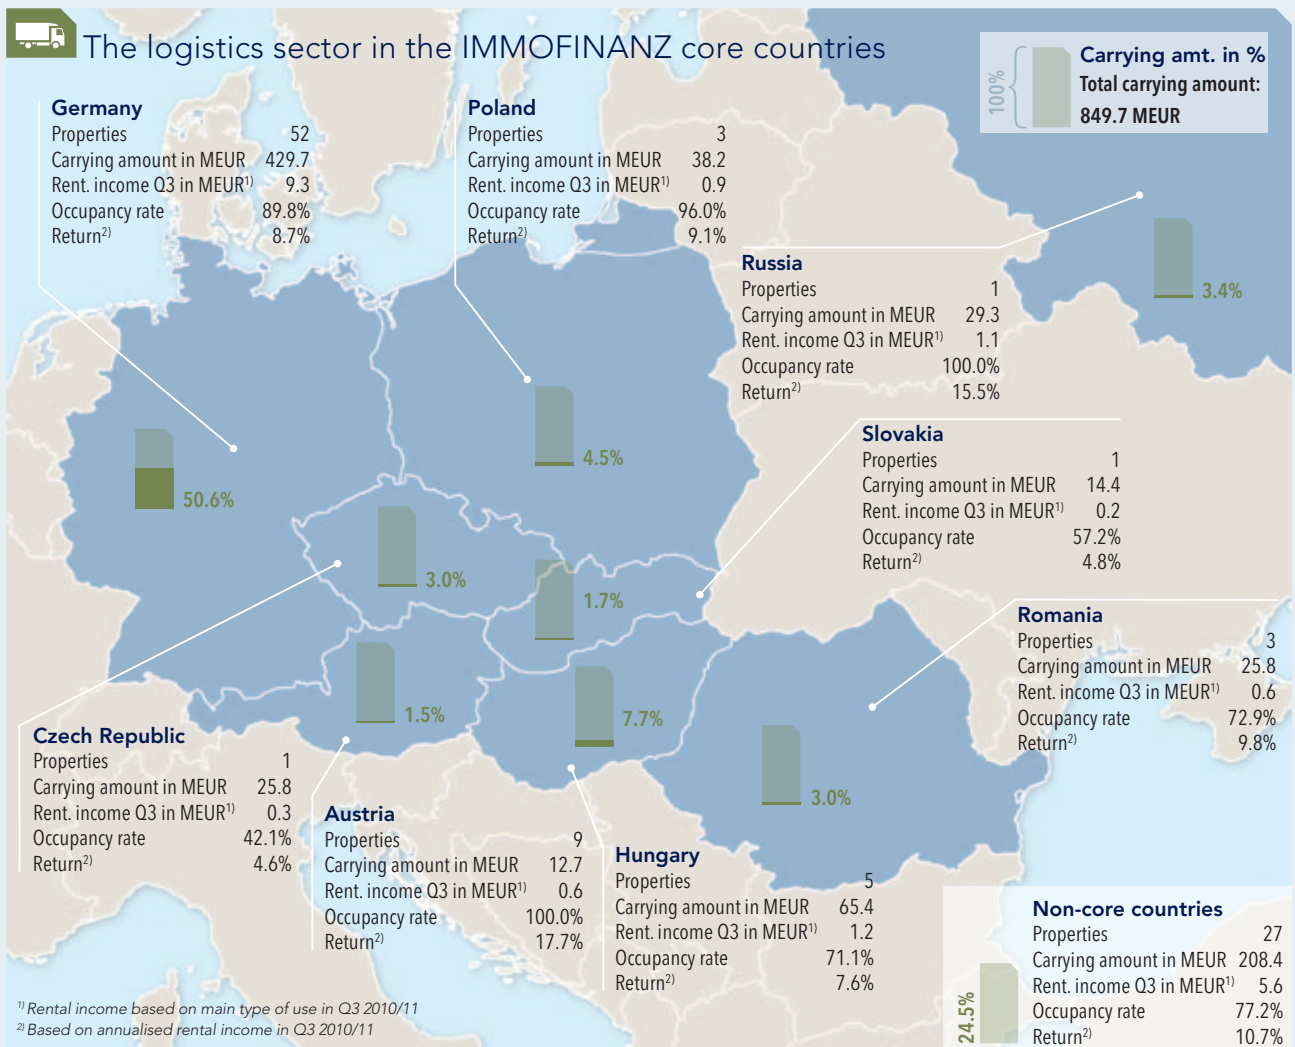

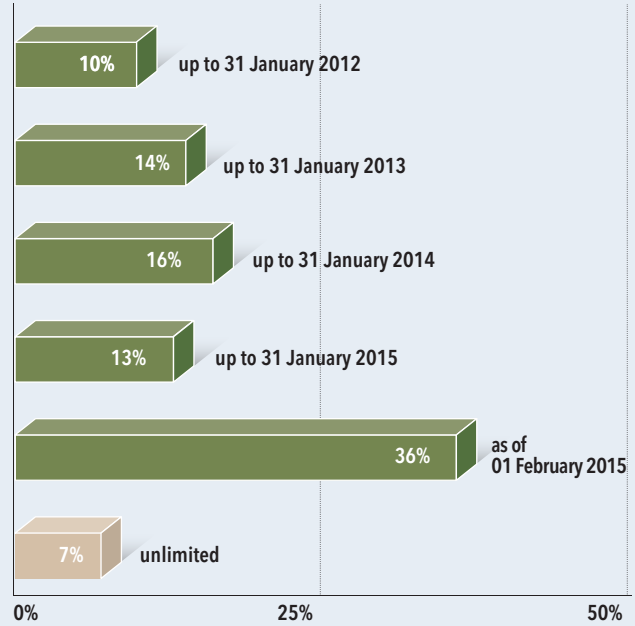

Logistics

The carrying amount of the 102 standing logistics investments amounted to EUR 849.7 million, or 10.0% of the standing investment portfolio as of 31 January 2011. In comparison with the standing investments in the other sectors, the logistics properties generate at 9.3% the highest returns. The top return was recorded in the core market of Austria at 17.7%. The logistics portfolio has an occupancy rate of 84.2%.

Germany forms the focal point of the logistics portfolio, with 50.6% of the standing logistics investments based on the carrying amount. The other core markets of the IMMOFINANZ Group each comprise less than 8% of the portfolio. The IMMOFINANZ Group also has major logistics properties in the non-core countries of the Netherlands (EUR 112.0 million) and Switzerland (EUR 80.6 million).

The carrying amount of the standing investments that are not classified under office, retail, residential or logistics properties amounted to EUR 186.9 or 2.2% of the standing investment portfolio as of 31 January 2011. These nine objects have 67,222.3 sqm of rentable space and an occupancy rate of 93.3%. This category consists, above all, of hotels in Austria. The most important object based on the carrying amount is the *Hotel Kempinski* in St. Moritz, Switzerland. These standing investments are not compatible with the strategic focus of the IMMOFINANZ Group because of their use, and they are therefore scheduled for sale over the short to medium term.

Development Projects

The balance sheet position “property under construction” comprises development projects currently under realisation by the IMMOFINANZ Group, which will be held after completion to generate rental income. The pipeline projects represent undeveloped land and frozen development projects.

Active development projects comprise 31.2% of the development projects and a combined carrying amount of EUR 177.9 million. The remaining carrying amount of EUR 391.7 million represents frozen development projects and undeveloped land.

Property under construction	Number of properties	Carrying amount in MEUR	Outstanding construction costs in MEUR	Planned rentable space in sqm	Fair value after completion in MEUR

Russia	1	44.5	85.7	50,561	158.5
Total	11	177.9	296.6	196,042	559.4

As illustrated in the above table, the development projects are currently concentrated in the core markets of Austria, Russia, the Czech Republic and Germany. In accordance with the strategy of the IMMOFINANZ Group, no development projects will be realised in non-core markets.

Based on the estimated fair value after completion, Russia is the most important core market for development projects. The following table shows the most important development projects, ranked by fair value after completion:

Project	Country	Type of use	Planned rentable space in sqm
Goodzone	Russia	Retail	67,415
Friesenquartier Köln	Germany	Office	49,100

Mühlgrund	Austria	Residential	4,672

The figures shown in the table represent 100% of the project and do not reflect the stake held by the IMMOFINANZ Group in the project.

The following projects are scheduled for completion in 2011: *Heller Park*, *Maritimo Shopping Center*, expansion of the *Silesia City Center* and *Mühlgrund*.

Project pipeline

The project pipeline comprises undeveloped land as well as temporarily suspended (“frozen”) projects. These projects are reported on the balance sheet under investment property, together with the standing investments.

The IMMOFINANZ Group monitors the relevant circumstances continuously in order to identify the right time to reactivate these projects. Decisions are based on the availability of building permits, the status of construction, the legal situation, the amount of capital previously invested by the IMMOFINANZ Group, the capital required to complete the project, the availability of bank financing, the level of pre-rentals, the expected return in comparison with the returns available on alternative projects and the opportunities for resale.

Inventories

Inventories represent properties that are developed for sale after completion. Condominium apartments are a classic example of inventories. In addition to condominium apartments that have been completed or are under construction, inventories also include pipeline projects – i.e. frozen development projects and undeveloped land – that are available for the construction of these housing units.

Project status of inventories as of 31 January 2011:

EUR 21.7 million or 9.7% of the inventories represent completed apartments that are currently available for sale. A further 21.7% of the inventories were under construction as of 31 January 2011, and 68.6% represent frozen projects or undeveloped land. The completed inventories consist primarily of condominium apartments in Austria and Serbia.

The following table illustrates the current focus of development projects on the core markets of Austria and Germany:

Property under construction	Number of properties	Carrying amount in MEUR	Outstanding construction costs in MEUR	Planned rentable space in sqm	Expected fair value after completion in MEUR
Austria	2	23.2	6.4	14,086	33.4
Germany	1	24.2	41.1	22,662	75.8
Total	3	47.3	47.5	36,748	109.1

The development projects with the highest expected fair value after completion are located in Cologne (D) and Vienna (AT):

Project	Country	Type of use	Planned sellable space in sqm
Friesenquartier Köln	Germany	Residential	45,323
Heller Park	Austria	Residential	13,660

The figures shown in the table represent 100% of the project and do not reflect the stake held by the IMMOFINANZ Group in the project.

The *Heller Park* project is scheduled for completion during the 2011 calendar year.

Properties held for sale

As of 31 January 2011 properties with a carrying amount of EUR 58.3 million were classified as held for sale. These objects are located in Austria and Germany, and were sold after the end of the reporting period.

The outstanding balances of the major liabilities owed by the IMMOFINANZ Group totalled TEUR 5,420,833.3 as of 31 January 2011. Of these financial liabilities 61.2% carry variable interest rates, whereby 40.5% are hedges with derivatives (CAPS and SWAPS). The weighted average interest rate of these liabilities was 2.64%. The remaining 38.8% of the major financial liabilities have a fixed interest rate of 3.20%. The weighted average interest rate of all major financial liabilities equals 2.86%.

Convertible bonds

The holders of the 2014 and 2017 convertible bonds have the right to redeem these securities prematurely (put option) in 2012. In order to refinance these bonds, IMMOFINANZ AG issued a convertible bond on 03 March 2011 (CB 2018) with a nominal value of EUR 515.1 million.

The term of the CB 2018 ends on 08 March 2018. The holders of the CB 2018 are entitled to redeem these securities prematurely (put option) on 08 March 2016 in accordance with the issue terms. Interest is payable semi-annually in arrears on 08 March and 08 September of each year, beginning on 08 September 2011, at a rate of 4.25% per year. The nominal value, which represents the original conversion price per share, equals EUR 4.12 for each convertible bond.

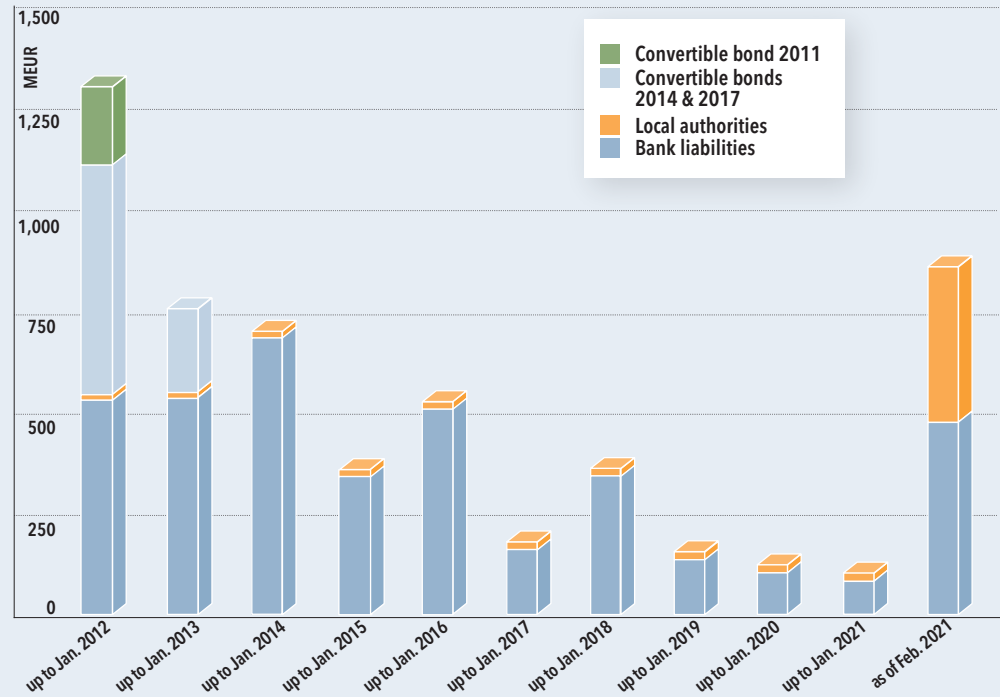

The proceeds from the CB 2018 were used to repurchase the convertible bonds that were tendered to the IMMOFINANZ Group by 08 March 2011. The IMMOFINANZ Group repurchased EUR 454.7 million of the 2014 convertible bonds and EUR 10.5 million of the 2017 convertible bonds.

The following table shows the liabilities from convertible bonds as of 31 January 2011:

The term structure of the major financial liabilities as of 31 January 2011 is shown on the following graph:

Including the 2018 convertible bond issued in March 2011 and the repurchase of the 2014 and 2017 convertible bond, the pro forma term structure of the major financial liabilities as of 31 January 2011 is as follows:

The 2011 convertible bond is due on 22 December 2011. Since the conversion price for this bond amounts to EUR 2.00 and was therefore substantially below the share price on 31 January 2011, it is assumed that investors will exercise their conversion right. Under the assumption that all investors exercise their conversion right, the weighted average interest rate for all major financial liabilities would be 2.61%, since the coupon (7% p.a.) due on 22 December 2011 would not be paid in the event of conversion.

Derivatives

As of 31 January 2011, the IMMOFINANZ Group held derivatives with a reference amount of TEUR 2,196,916.7 to hedge or cap interest rates.

	Variable element	Market rate as of 31 January 2011 in %	Market value incl. interest as of 31 January 2011 in TEUR	Reference amount in TEUR	Fixed interest rate in %

Total			-19,795.4	2,196,916.7	

The interest expense associated with a further 40.50% of the major financial liabilities is hedged through the use of CAPS and SWAPS. CAPS define an upper limit for the interest rate: if the defined interest rate exceeds this limit, the IMMOFINANZ Group is entitled to receive a settlement payment from its contract partner. SWAPS are used to exchange variable for fixed interest payments: variable interest liabilities that are hedged through a SWAP are therefore seen as fixed-interest liabilities. Including the derivative instruments, the weighted average interest rate of the major financial liabilities equals 3.29%.

Business Development

The IMMOFINANZ Group confirmed the successful turnaround and the upward trend of the first and second quarters with an increase in earnings during the third quarter of 2010/11. The continuous optimisation of the portfolio and costs as well as an increased focus on cash flow generation should support a further improvement in operating results during the coming quarters.

Income from asset management

Rental income amounted to EUR 423.1 million for the first three quarters of 2010/11, for a plus of 5.6% over the comparable prior year period (EUR 400.8 million). This growth was supported above all by the third quarter, which brought a substantial increase of 6.8% or EUR 9.3 million in rental income. In comparison with the second quarter of 2010/11, the increase amounted to 5.5% or EUR 7.6 million.

Rental income increased year-on-year in the retail (+24.0%), residential (+2.7%) and logistics (+8.6%) segments, but declined in the office segment (-9.4%). This decrease resulted from the sale of properties and the start of construction on the previously rented Gerling Quarter in Cologne.

Revenues rose by 4.1% from EUR 536.8 million to EUR 558.6 million for the first three quarters of 2010/11. The increase of EUR 38.9 million or 55.3% in real estate expenses reflected higher maintenance and renovation activities that are intended to improve the marketability of properties, above all in Austria. Income from asset management therefore fell slightly to EUR 333.5 million (2009/10: EUR 347.4 million).

Income from property sales

The sale of properties generated income of EUR 19.4 million in the first nine months of 2010/11 (prior year: EUR 35.4 million). These transactions focused primarily on residential properties in Austria.

Income from property development

The sale of inventories generated proceeds of EUR 56.0 million and income of EUR 10.6 million during the reporting period. Proceeds from the sale of apartments more than tripled over the prior year level (EUR 16.0 million). The proceeds from the sale of these inventories were recorded above all in Austria (EUR 45.4 million) and Poland (EUR 6.4 million).

Other operating income

Approximately one-half of the other operating income of EUR 36.7 million recorded in the third quarter is attributable to the waiver of a receivable by a financial institution. This receivable was related to a property that was taken over in connection with the agreements with Constantia Packaging B.V.

EBITDA, EBIT, EBT, net profit for the period and cash flow

Results of operations (EBITDA) clearly exceeded the comparable prior year level at EUR 111.2 million for the third quarter of 2010/11. However, EBITDA was still slightly lower in year-on-year comparison with a 4.4% decline from EUR 306.1 million to EUR 292.6 million. This decline resulted primarily from the increase in real estate expenses.

Positive valuation results of EUR 50.7 million (2009/10: EUR -59.4 million) led to a 39.2% improvement in EBIT, which rose from EUR 246.7 million to EUR 343.3 million. Financial results declined from EUR 19.1 million to EUR -91.9 million, solely due to non-cash accounting effects from foreign exchange fluctuations (EUR -48.4 million versus EUR 92.7 million in 2009/10) that were only offset in part by the positive valuation of financial instruments (EUR 30.0 million versus EUR -46.9 million in 2009/10). Earnings before tax (EBT) were therefore – still – below the previous year, with a decline from EUR 265.8 million to EUR 251.4 million. Net profit for the period rose from EUR 221.1 million to EUR 229.3 million due to a lower tax rate.

Gross cash flow rose by 19.9% from EUR 252.9 million to EUR 303.2 million. Cash flow from operating activities increased to EUR 333.1 million, which reflects an improvement of EUR 62.7 million or 23.2% in comparison with the first three quarters of 2009/10 (EUR 270.4 million). This development resulted chiefly from the reduction of receivables (EUR 181.3 million).

Operating cash flow, which comprises cash flow from operating activities and cash flow from investing activities, more than tripled to EUR 381.3 million for the first three quarters of the reporting year (2009/10: EUR 111.5 million). This development resulted above all from the proceeds on property sales, which significantly exceeded investment costs.

NAV per share and earnings per share

Diluted net asset value (NAV) per share rose from EUR 4.78 on 30 April 2010 to EUR 5.13 as of 31 January 2011. This increase is attributable to the sound earnings generated during the first three quarters of 2010/11 as well as the positive effects of the share buyback programme. Based on the share price as of 31 January 2011 (EUR 3.22), the IMMOFINANZ share traded at a discount of 37.2% to the NAV. Diluted earnings per share for the first three quarters of the reporting year amounted to EUR 0.23, which represents an increase of more than 15.0% over the comparable prior year period (2009/10: EUR 0.20).

Gross return and occupancy in the standing investments

The third quarter also brought a significant improvement in property indicators. The occupancy rate in the IMMOFINANZ properties amounted to 89.0% as of 31 October 2010, but rose to 89.7% by the end of January 2011. The gross return on the standing investment portfolio, which equalled 6.6% for the first half-year, increased to 6.9% in the third quarter.

1. Accounting and Valuation Principles

The interim financial report of IMMOFINANZ AG as of 31 January 2011 was prepared in accordance with the International Financial Reporting Standards (IFRS) that were valid as of the balance sheet date, to the extent that these standards had been adopted into the body of law of the European Union through the procedure set forth in Art. 6 Par. 2 of IAS regulation 1606/2002. The interim financial report was prepared according to the rules of IAS 34.

Information on the IFRS and significant accounting policies applied by IMMOFINANZ AG in preparing this interim financial report is provided in the consolidated financial statement as of 30 April 2010.

During the 2009/10 financial year a number of changes were made in the presentation of the income statement, the balance sheet and segment reporting. The structure of the income statement was changed to provide better and faster understanding of the various components of earnings. The structure of the balance sheet was adjusted to meet the requirements of IAS 1. In connection with the restructuring process that involved the entire corporation, IMMOFINANZ Group management redefined the operating segments. Segment reporting was then adapted to reflect this new management viewpoint and the prior year data were adjusted accordingly.

Additional information on the resulting reclassifications is provided in the consolidated financial statements as of 30 April 2010.

This interim report by IMMOFINANZ AG was neither audited nor reviewed by a certified public accountant.

The interim financial statements are presented in thousand EURO ("TEUR", rounded). The use of automatic data processing equipment can lead to rounding differences in the addition of rounded amounts or percentage rates.

Share of profit/loss from associated companies	76.2	29,180.6
Financial results	-91,896.5	19,101.9

As in 2009/10, financing costs and financing revenue are attributable to financial instruments that are not carried at fair value.

The foreign exchange differences shown in the above table result primarily from the valuation of loans and Group financing.

The valuation of financial instruments at fair value through profit of loss comprises revaluations of TEUR 43,551.2 and impairment charges of TEUR 13,533.2.

3.7 Income taxes

This item includes income taxes paid or owed by Group companies as well as provisions for deferred taxes..

All amounts in TEUR	01 May 2010–31 January 2011	01 May 2009–31 January 2010
Income tax expense	-13,715.9	-10,520.9
Provisions for deferred taxes	-8,336.1	-34,191.1
Total	-22,052.0	-44,712.0

3.8 Net Asset Value

Net asset value is calculated in accordance with the Best Practices Policy Recommendations (Chapter 6.3) issued by the European Public Real Estate Association (EPRA) based on the following principles:

Equity as shown in the IFRS financial statements (excluding non-controlling interests) is adjusted by the difference between the carrying amount and the fair value of property that does not qualify for valuation at fair value. An adjustment is also made for any financial instruments that are not carried at fair value. In a last step, deferred tax assets and deferred tax liabilities are offset against equity.

The results of the calculation are shown below:

All amounts in TEUR	31 January 2011		30 April 2010		31 January 2010	
Equity before non-controlling interests	4,806,039.6		4,831,953.8		2,344,791.1	
Goodwill	-216,624.2		-206,042.3		-190,606.9	
Deferred tax assets	-371,401.2		-265,936.6		-57,138.2	
Deferred tax liabilities	995,846.6	5,213,860.8	895,083.7	5,255,058.6	781,672.4	2,878,718.4
Inventories (carrying amount)	218,300.8		252,308.5		267,488.7	
Inventories (fair value)	231,375.4	13,074.6	263,349.0	11,040.5	274,233.4	6,744.7
Non-controlling interests		0.0		0.0		-238,594.2

5. Subsequent Events

The IMMOFINANZ Group sold a property in the prime inner city location of Hamburg to Aachener Grundvermögen Kapitalanlagegesellschaft at the beginning of February 2011.

On 28 February 2011 the IMMOFINANZ Group announced the sale of the Castrop Rauxel retail park by its 100% subsidiary IMF Deutschland GmbH. The buyer, Cordea Savills German Retail Fund, a Luxembourg-based investment fund specialised in retail property, purchased the property for TEUR 9,800.0.

On 14 February 2011 the Executive Board of IMMOFINANZ AG, with the consent of the Supervisory Board, announced its intention to issue up to 125,029,692 convertible bonds due in 2018. The following final terms were established by a book-building process: a coupon of 4.25% per annum, payable semi-annually in arrears on 08 March and 08 September each year, commencing on 08 September 2011; and a conversion premium of 32.50% over the volume-weighted average price of the Company's share on the Vienna Stock Exchange from the start of trading until pricing, which amounts to EUR 3.1069. A subscription price of EUR 4.12 per convertible bond was defined. This price represents the nominal amount, the issue price, the initial conversion price and the redemption price per convertible bond.

On 14 February 2011 the Executive Board of IMMOFINANZ AG also issued an invitation to the holders of the outstanding 2.75% convertible bonds due 2014 and the outstanding 1.25% convertible bonds due 2017 to sell their securities for purchase by the Company in accordance with the terms and conditions of the tender invitation memorandum dated 15 February 2011.

On the basis of the terms and the conditions of the memorandum, the Company announces the tender results as follows:

Total principal of CB 2014 offered to the Company	EUR 454,700,000.00
Total principal of CB 2014 accepted for purchase by the Company	EUR 454,700,000.00
Accrued interest for each CB 2014 bond certificate accepted	EUR 361.64
Total principal of CB 2017 offered to the Company	EUR 10,500,000.00
Total principal of CB 2017 accepted for purchase by the Company	EUR 10,500,000.00
Accrued interest for each CB 2017 bond certificate accepted	EUR 373.29

The settlement of the tender invitation will take place on 08 March 2011.

After the end of the reporting period (on 01 February 2011), IMMOFINANZ AG issued an announcement pursuant to § 93 (1) of the Austrian Stock Exchange Act and reported a total of 1,044,973,586 voting rights as of 28 February 2011. Issued capital amounted to EUR 1,084,874,173.26 at the end of February 2011 and is divided into 1,044,973,586 zero par value shares with voting rights and a proportional share (rounded) of EUR 1.04 each in share capital.
