About the Lenzing Group

The Lenzing Group stands for eco-responsible production of specialty fibers based on cellulose and recycled material. As an innovation leader, Lenzing is a partner of global textile and nonwoven manufacturers and drives many new technological developments. The Lenzing Group's high-quality fibers form the basis for a variety of textile applications ranging from functional, comfortable and fashionable clothing to durable and sustainable home

textiles. Due to their special properties and their botanical origin, the TÜV certified biodegradable and compostable Lenzing fibers are also highly suitable for everyday hygiene products.

The business model of the Lenzing Group goes far beyond that of a traditional fiber producer. Together with its customers and partners, Lenzing develops innovative products along the value chain, creating added value for consumers. The Lenzing Group strives for the efficient utilization and processing of all raw materials and offers solutions to help transform the textile industry from the current linear economic system towards a circular economy. In order to reduce the speed of global warming and thus also support the targets of the Paris Agreement and the EU Commission's "Green Deal", Lenzing has developed a clear science-based climate action plan that aims to significantly reduce greenhouse gas emissions by 2030 and a net-zero goal (scope 1, 2 and 3) by 2050.
