Change of the UTX Index Management Rules

As of March 21, 2008 the share quotations used for the calculation of UTX will be selected according to their bid/ask spread. Quotes with a bid/ask spread greater than 20% will not be considered for index calculation. The spread is defined as difference between bid and ask quotation divided through the mid rate (average between bid and ask). The spread limit will be reviewed and adjusted as necessary by the index committee at the quarterly meetings.

All adjustments will be implemented after the close of the trading session on **March 20, 2008!**
